SUMMARY

Full Stack Developer with practical experience in web developement (React, Node.js, PHP and ASP.NET), I built through a full-stack coding bootcamp and hands-on projects work across front-end and back-end development. My experience spans customer-facing features, internal tools, and CRM systems, with exposure to structured software design and working directly with end users to translate needs into working solutions. Comfortable moving between interactive interfaces and back-end services, with a practical, problem-solving approach to building features. Looking for a junior/medior full-stack role to keep growing hands-on.

TECHNICAL SKILLS

Languages	Javascript · C# · VB · PHP
Frontend	React · Redux · Zustand
Backend	NodeJS · Express · ASP.NET · Symfony

EXPERIENCE

EMPLOYMENT

JD Solutions — Tel Aviv, Israel
Full Stack Developer — 01/2024 – 11/2024

- Built and maintained CRMs using PHP, SQL, and jQuery, streamlining customer management and improving data accessibility.
- Engaged with customers to understand needs and implemented tailored solutions, increasing client satisfaction and solution relevance.

Acta Assistance EPSI — Limonest, France
ASP.NET Developer — 06/2017 – 02/2018

- Developed web applications in VB ASP.NET with Telerik and LLBL ORM, streamlining internal management processes for the company's services.
- Integrated SQL Server databases, enhancing data handling and performance across applications.

Technical Project Manager — 09/2016 – 06/2017

- Wrote documentation for application use cases, ensuring clarity and alignment on functionality for end-users and stakeholders.
- Tested applications with the project management team, developing test procedures and documenting bug reports to improve application quality and reliability.

INTERNSHIP

Kubiweb M2I FORMATION — Dardilly, France
PHP Symfony Developer — 10/2019 – 12/2019

- Redesigned and overhaul the CRM from PHP to Symfony, resulting in improved structure and maintainability.
- Analyzed initial code and implemented architectural framework using Merise Method and UML, enhancing development efficiency and scalability.

Alter Systems EPSI — Lyon, France
ASP.NET Developer — 06/2015 – 08/2015

- Analyzed the project in MVC architecture, resulting in a well-structured framework for efficient development and maintenance.
- Wrote an algorithm to read Word file structures, enabling automated retrieval of table of contents data.
- Managed the summary display and selection of Word file contents on the front end, providing users with an interactive and accessible overview.

Lorge Imprimeur EPSI — Venissieux, France
Web Developer — 01/2015 – 03/2015

- Developed a contact management application with Web 2.0 features using AJAX methods, enhancing user experience with seamless, real-time interactions.

EDUCATION

Full Stack Web Development, Python and JavaScript program — Tel Aviv, Israel
Developers Institute, TLV Coding Bootcamp — 08/2023 – 12/2023

Conception and Application Development, Component Based Architecture — Lyon, France
M2i Formation — 01/2019 – 10/2019

IT and Network System Development — Lyon, France
EPSI School of Computer Engineering — 09/2013 – 02/2018
